

# Arya Abadi

Frontend Developer

## Personal Info

**Email**  
arya.abadi89@gmail.com

**Phone**  
0739188350

**LinkedIn**  
<https://www.linkedin.com/in/arya-abadi/>

**Address**  
Malmö, Sweden

## Skills

React.js

Next.js

TypeScript

JavaScript (ES6+)

Redux

Node.js

REST API development & integration

Supabase / PostgreSQL

Responsive & cross-device UI design

Reusable component development (Storybook)

Frontend performance optimization

Accessibility (WCAG compliance)

CMS-driven web application development

Jest (testing)

Debugging & input validation

Git, GitHub, Azure

CI/CD Pipelines

Agile/Scrum

Sprint planning, stand-ups, and retrospectives

n8n and AI agents

Cross-functional team collaboration

## Languages

English

Frontend Developer with 5+ years of experience building scalable, high-performance web applications using React.js, TypeScript, and modern JavaScript frameworks. Developed reusable UI components, optimized frontend architecture, and implemented accessibility and performance best practices. Integrated REST APIs, backend services, and AI-driven features that enhanced functionality and improved user engagement. Collaborated in Agile teams, and led process improvements to streamline development. Delivered efficient, innovative, and user-friendly digital experiences using the latest technologies.

## Work History

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 2025 - 2026 | <div><b>Senior Frontend Developer</b></div> <div><i>Oatly, Malmö, Sweden</i></div> <div><ul style="list-style-type: none"><li>Delivered a large-scale, CMS-driven web application for Oatly's global website, supporting 50K+ monthly users across 10+ countries</li><li>Improved web accessibility by implementing WCAG standards, increasing Lighthouse accessibility scores from 70% to 95%</li><li>Enhanced critical user journeys, reducing page load times by 25–30% on high-traffic pages and improving Core Web Vitals</li><li>Built and maintained 50+ reusable UI components, documented in Storybook, accelerating feature development by 30%</li><li>Collaborated with product, design, and content teams to enable scalable, localized global content delivery</li></ul></div> <div>Tech: React, TypeScript, Next.js, SCSS, Storybook, Storyblok (CMS), Lighthouse, WCAG, Azure DevOps</div>                                                                                           |
| 2024 - 2025 | <div><b>Software Engineer</b></div> <div><i>Mabel AI, Gothenburg, Sweden</i></div> <div><ul style="list-style-type: none"><li>Led development and maintenance of full-stack systems for the Mabel Interpreter, Scribe applications and internal admin tools.</li><li>Engineered and optimized RESTful APIs and backend logic, improving API response times by 25% and enabling secure data exchange across 3+ internal and external systems</li><li>Designed Supabase (PostgreSQL) database schemas, including row-level security policies and stored procedures, ensuring data integrity, security, and efficient processing</li><li>Mentored 1–2 junior developers through onboarding, code reviews, and engineering best practices, improving code quality</li></ul></div> <div>Tech: React, TypeScript, Tailwind CSS, Node.js, REST APIs, Supabase, PostgreSQL, SQL, Authentication, Git, CI/CD</div>                                                                                           |
| 2022 - 2024 | <div><b>Frontend Developer</b></div> <div><i>MailSentry, Manila, Philippines</i></div> <div><ul style="list-style-type: none"><li>Migrated a legacy JavaScript codebase to TypeScript, improving type safety, maintainability, and overall developer experience</li><li>Implemented scalable Next.js pages and reusable React components, ensuring high performance, responsiveness, and cross-device consistency</li><li>Implemented data-driven admin dashboards to monitor email delivery, system health, and workflows, reducing support requests by 20%</li><li>Developed REST APIs and integrated webhooks, processing 5,000+ daily events to enable real-time notifications and reliable third-party integrations</li><li>Contributed to an Agile/Scrum development process, achieving 100% sprint goal completion across 12+ sprints</li></ul></div> <div>Tech: React, TypeScript, Next.js, JavaScript, REST APIs, Webhooks, Tailwind CSS / CSS, Data Visualization, Agile/Scrum, Git</div> |

2020 - 2022

**Frontend Developer**

*FlyToday, Tehran, Iran*

- Developed and optimized user interfaces using React.js and Redux, improving usability and increasing user engagement by 15%
- Engineered and maintained 30+ reusable UI components and internal frontend libraries, boosting development efficiency across multiple projects by 25%
- Debugged and refined application logic, achieving 100% client-side input validation prior to backend submission and reducing runtime errors
- Conducted 10+ code reviews per month, upholding high engineering standards and mentoring team members through constructive feedback
- Collaborated within Agile/Scrum teams, contributing to sprint planning, stand-ups, and retrospectives to support continuous delivery

Tech: React, Redux, JavaScript (ES6+), HTML5, CSS3 / SCSS, Client-Side Validation, Component Libraries, Agile/Scrum, Git

2014 - 2020

**Head of Systems & Processes**

*Kowsar Insurance, Tehran, Iran*

- Led organization-wide process optimization across 12+ departments, impacting 1,500+ employees
- Standardized 80+ end-to-end business processes using BPMN 2.0, improving operational efficiency by 30%
- Facilitated cross-departmental workshops using Miro to map and extract business processes, translating findings into BPMN diagrams in Bizagi and Visio
- Directed system-supported transformation initiatives as solution owner, coordinating 5+ vendor integrations and ERP enhancements
- Formulated BPMN-based process blueprints to guide workflow automation and ERP improvements, supporting hundreds of daily users in operations, finance, reporting, and compliance

Tech: Miro, Bizagi, Visio, BPMN 2.0, ERP systems, Workflow Automation, Vendor Integration, Process Mapping, Cross-Functional Leadership

---

**Education**

---

2007 - 2011

**Bachelor of Software engineering**

*Iran University of Science and Technology*
